

PC Sump Version 6.1 for Stormwater Infiltration Basins

PC Sump is the standard software for sizing of infiltration basins in Western Australia and is referenced by Main Roads Western Australia for road design packages.

The newly developed PC Sump Version 6.1 by JDA Consultant Hydrologists incorporates:

- The latest Australian Rainfall & Runoff (2019) storm IFDs and temporal patterns;
- In-built IFDs for 111 locations across Western Australia with an option to import a download IFD;
- Interim Climate Change Guideline from ARR (2019);
- Enhanced Catchment Loss Model;
- An optional Swale Infiltration module (up to 3 swales); and
- New algorithms for all 3 options of Deep Water Table, Shallow Water Table and Clogged Layer.

PC Sump V6.1 is an Excel based program.
